# TRAIL RUNNING

**16** *Traick*  
Snug-fit and ultralight  
Trail Running Vest

**19** *Traick Belt*  
Minimalist and technical –  
perfect for shorter trail runs.

# HIKING

**20** *Futura series*  
Comfortable to carry with effective  
ventilation for day hikes and  
multi-day hikes

**24** *Futura Pro series*  
Ideal for long-distance hiking:  
extremely breathable and  
comfortable

# TREKKING

**40** *Aircontact Core series*  
Maximum carrying comfort  
on challenging tours

# MOUNTAINEERING

**52** *Guide Lite series*  
For ambitious  
alpinists –  
ultra-light,  
technical  
and reliable

**54** *Guide series*  
Comfortable to carry, sturdy and  
reliable for alpine terrain.

# BIKE

**70** *Visby series*  
Waterproof functional  
bike pannier

**84** *Attack series*  
TÜV/GS-certified protector backpack  
with clever features

**87** *Attack Jr*  
TÜV/GS-certified  
protector backpack  
for junior mountain bikers

# SLEEPING BAG

**128** *Astro Pro series*  
Maximum insulation  
at minimal weight

**134** *Dreamlite series*  
Freedom of movement,  
cozy and 360 ° insulation

**141** *Starlight Down series*  
Durable children's sleeping bag  
that grows with them

# ACCESSORIES

**169** *Multistrap series*  
Tough, no-frills  
and multi-purpose

# WORKER VOICES:

*better working conditions through complaints mechanism further down the supply chain.*

“People” is one of the key pillars of the deuter Promise Strategy. For us, it means adopting responsibility toward our customers, society as a whole, and all the people who work to design, manufacture and sell our products – from our own employees through to those further down the supply chain.

A key aspect of this is achieved through strengthening workers’ rights and giving them a voice. As atlat’s first partner, we’ve been collaborating with them on a digital complaints system that targets those areas that often benefit from the least protection – lower down the supply chain. The aim is to offer workers at our subcon-

tractor sites access to an effective, anonymous, readily available complaints mechanism. Using an automated chat function, grievances can be submitted directly and anonymously. The atlat platform supports businesses in processing complaints in a structured way. Automated translations reduce language barriers and foster more trust in the communications.

The system is part of a comprehensive, three-stage concept that we have implemented together with our manufacturing partners: Workers and management teams are first given extensive training on workers’ rights, before being taught how to use the complaints

*“At atlat, we have combined our passion and digital expertise to create software that has real social impact. We aim to help companies like deuter strengthen workers’ rights further down the supply chain and improve working conditions beyond legal requirements. We are proud of our collaboration with deuter, which from the very first meeting has been characterized by our shared values.”*

**Josua Ovari** – CEO atlat

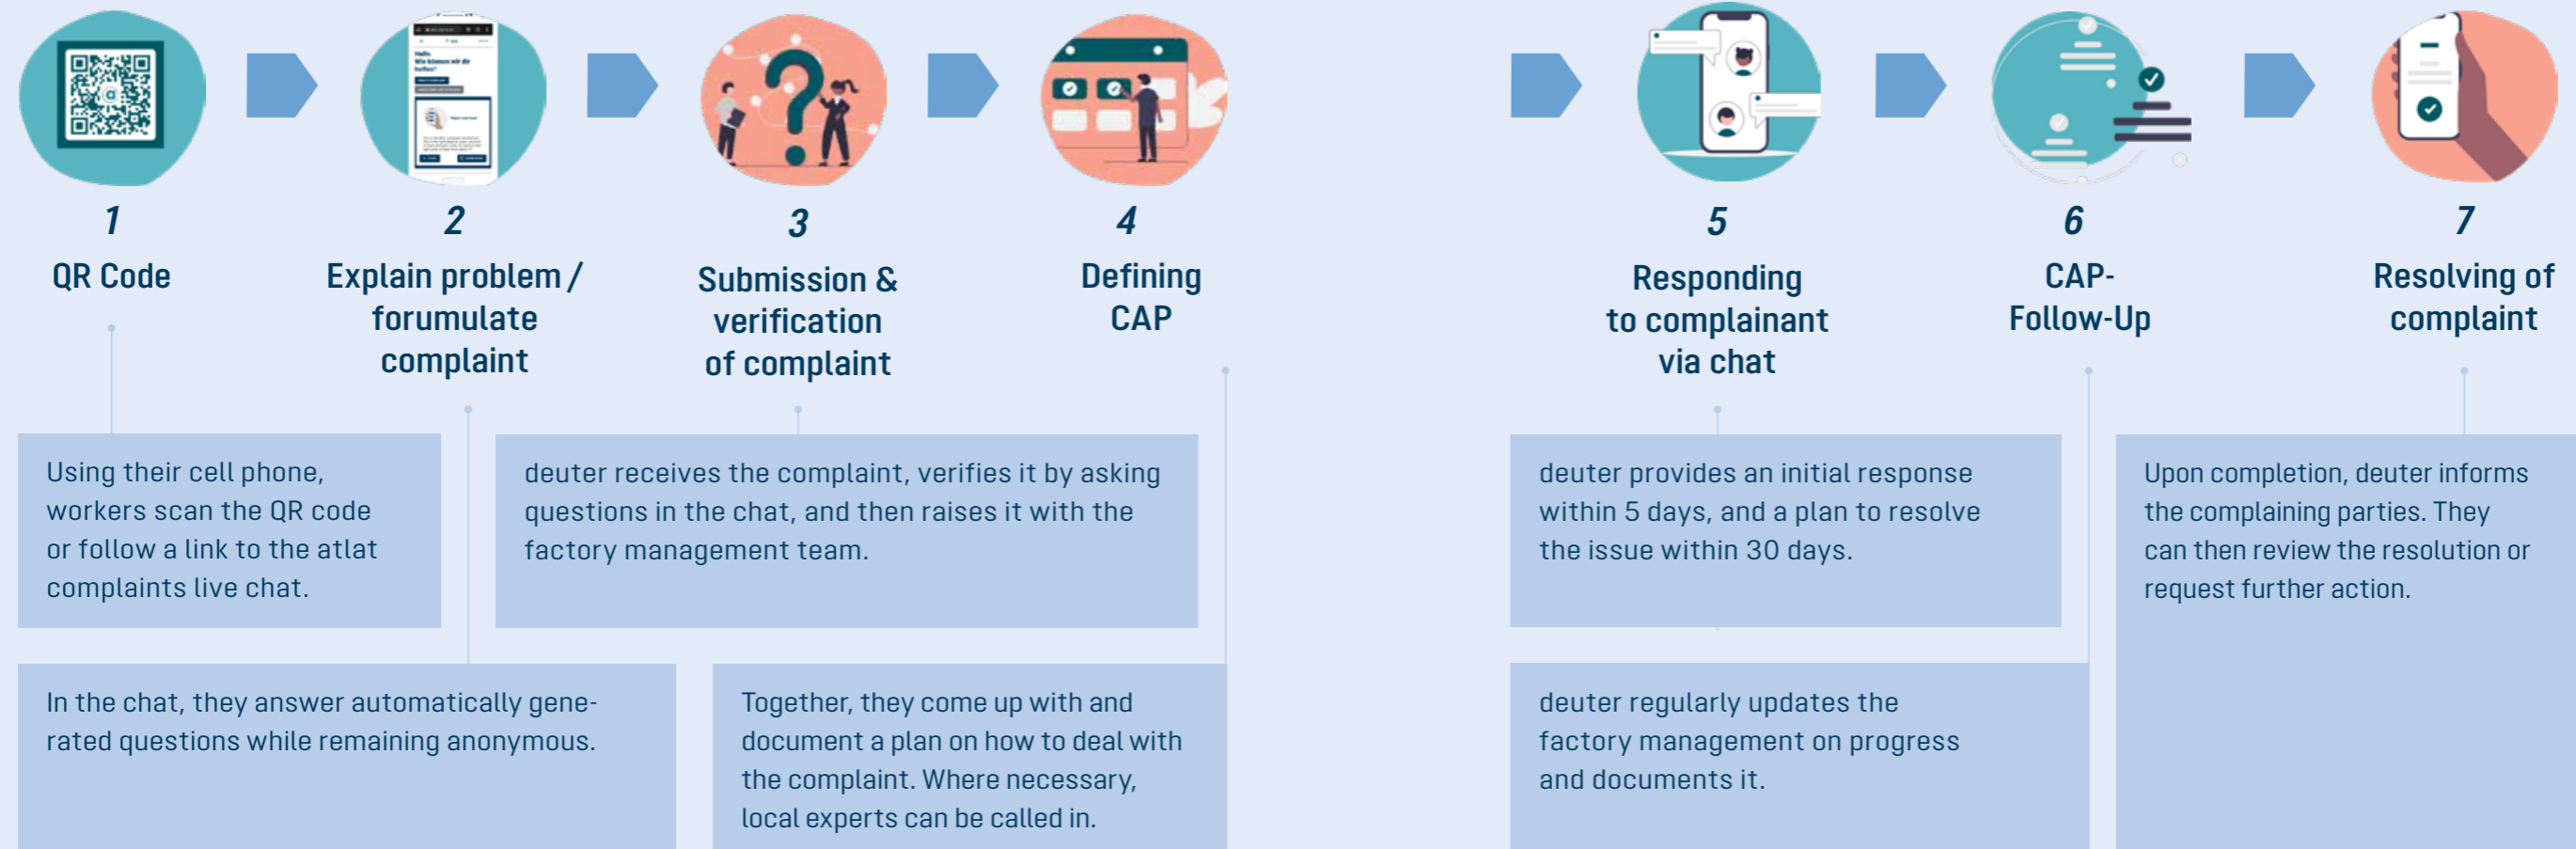

mechanism and given long-term skills. Special emphasis is placed on how to deal with complaints and on the prevention of gender-based violence.

Currently, we are implementing this scheme at nine manufacturing partner sites in Vietnam, in collaboration with ORTOVOX, CARE Germany, and the Partnership for Sustainable Textiles. These include yarn, materials

and fabric manufacturers. On-site training is carried out by the local NGO, CDI (Center for Development and Integration), which specializes in workers’ rights.

Our close partnership with atlat means we can make a lasting contribution to improving workers’ rights in the global supply chain. Each complaint is an opportunity to improve and better uphold workers’ rights.

## THE ATLAT COMPLAINTS PROCESS

# OUR OWN INITIATIVES

We are especially proud of the sustainability initiatives that we have undertaken ourselves and which we have already been successfully implementing for some time. These are further grist for the mill in realizing our vision and our holistic, fully integrated road to sustainable business practices.

## MADE WITHOUT PER- AND POLYFLUOROALKYL SUBSTANCES (PFAS)

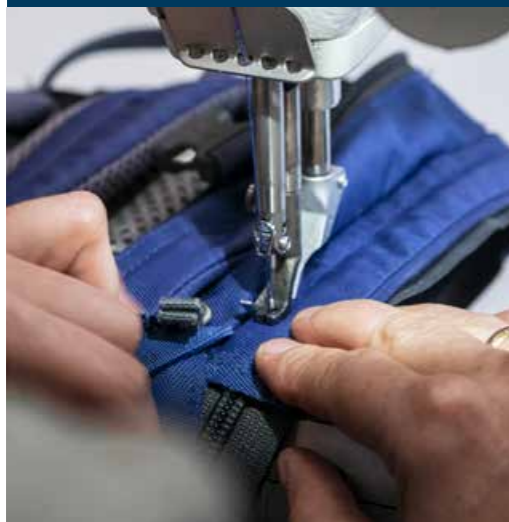

Our entire range is free of intentionally-added PFAS since 2020. Since then, deuter has used an environmentally friendly finish that produces the same high standards in water and dirt repellency, but which is also harmless to human and animal health.

## LIFELONG REPAIR SERVICE

We offer our customers a lifelong repair service in order to extend the usable lifetime of our products and thereby help conserve natural resources. In 2024 we shipped around 21,000 spare parts and mended about 5,100 products world-wide – which equates to roughly 14 repairs a day. For us, there is no doubt: it's better to make do and mend, than throw something away.

For more information head to our website [www.deuter.com/responsibility](http://www.deuter.com/responsibility)

# OUR PARTNERS

## WE MANUFACTURE ACCORDING TO BLUESIGN® STANDARDS, TO PROTECT PEOPLE AND PLANET

Since 2008 we've used the bluesign® system standard, the world's strictest standard for environmental protection, occupational safety, and consumer protection in the textile industry.

## FAIRNESS FROM A TO Z WITH THE FAIR WEAR FOUNDATION (FWF)

We have held FWF membership since 2011, a multi-stakeholder initiative that works together with companies and factories to improve working conditions in textile and garment factories. We have achieved FWF Leader Status every year since 2013. And in 2022 we were awarded the German Sustainability Prize in recognition of our long-lasting collaboration with our suppliers.

## PARTNERSHIP FOR SUSTAINABLE TEXTILES – UNITED FOR GREATER SUSTAINABILITY

We have been members of the Partnership for Sustainable Textile since 2014. The initiative brings together stakeholders from business, civil society, standards organizations, and trade unions under one umbrella.

## GREEN BUTTON FOR GREEN PRODUCTS

To help protect people and planet, deuter collaborates with the international "Green Button" (Grüner Knopf) standard. Initiated by the German government, it is the world's first state-supervised certification mark to establish compliance standards for sustainably produced textiles.

## RESPONSIBLE DOWN STANDARD (RDS) – FOR THE LOVE OF ANIMALS

Even sustainable natural materials have to be produced in an environmentally responsible way. That is why, since 2015, we've exclusively used high-quality feathers that are Responsible Down Standard certified for all of our down sleeping bags. This requires animal welfare and farming practices to be traceable throughout the entire production chain.

## SUSTAINABLE DEVELOPMENT GOALS – GLOBAL GOALS FOR A SUSTAINABLE FUTURE

The UN's 2030 Agenda is a comprehensive roadmap to a peaceful, sustainable, and prosperous world for us all. It is based on 17 Sustainable Development Goals (SDGs), which we use to guide us in shaping our sustainability agenda.

## TOGETHER WE ARE STRONGER REDUCING AND OFFSETTING

To achieve our climate goals, we are working together with the international experts at ClimatePartner. As of 2021 we are a ClimatePartner certified company and since 2025, all deuter products are ClimatePartner certified.

# DEUTER TRAINING GOES DIGITAL

Get The Facts digital: deuter's retail training now includes eLearning – a smart way of increasing product knowledge for the whole team

So you can stay up to date with everything deuter-related, or quickly bring new employees up to speed. And it's mobile too. Because the more knowledge you have, the more we all benefit.

SCAN THE QR CODE or head to [getthefacts.deuter.com](http://getthefacts.deuter.com)

# WHAT'S NEW?

## „TAKING COMFORT TO EXTREMES“

*Not just a benchmark, it's a promise.*

**Comfort has no limits.** As sleeping bag experts and world-leading backpack manufacturers, we've been on a mission to maximize the comfort of our products for over 125 years. It spurs us on to innovate and come up with the best, most sophisticated back systems on the market.

We're serious about **“Taking comfort to extremes”**. It's a promise we've made to ourselves and to our customers.

Because by ensuring our products deliver extreme comfort in extreme conditions, it allows you to push beyond your comfort zone.

This season, we've confirmed that promise once again. With our **new innovative back system for the Aircontact Core backpacking pack**, our **classic hiking pack, the Futura Pro**, and the **anniversary edition of our Attack biking backpack**.

### AIRCONTACT CORE

## AIRCONTACT CORE

*Comfortable load control for extended backpacking journeys*

The **Aircontact Core's** innovative back system takes carrying comfort and load control to a new level. Our new **VariClick** system offers five-stage back length adjustment for a tailored fit. This easy-to-use feature benefits from an audible 'click' when in position and ensures the back system is evenly adjusted. Also new: Our **ActiveBalance** shoulder straps that counterbalance your movement, while the **VariFlex hip fins** with ECLsystem give the pack a balanced feel and evenly distribute the load. An aluminum Y-shaped frame gives the pack stability and, combined with the breathable **Air Spacer mesh** across the back, generates effective airflow – which is important on long journeys. The continuous one-piece padding in the hip fins and shoulder straps cuts out pressure spots and increases the carrying comfort, no matter how heavy the load.

AIRCONTACT CORE 55+10 SL

## FUTURA PRO

*More energy for the hiking trail*

The Futura Pro also benefits from our innovative new **VariClick system**. With its **adjustable back length** and two positions for the stabilizer straps, it adapts to the size of the person carrying it. Directly anchored to the frame, the shoulder straps deliver improved load transfer, while the hip fins distribute the weight evenly and the one-piece padding eliminate pressure spots.

FUTURA PRO 32

The materials we've selected for our **Aircomfort back system** make it even lighter and airier. Extending the back mesh into the lumbar region and using softer mesh not only gives it better ventilation but also creates a supple, wrapping fit.

# 20 YEARS OF THE ATTACK

## 20 YEARS OF UNBEATABLE PERFORMANCE

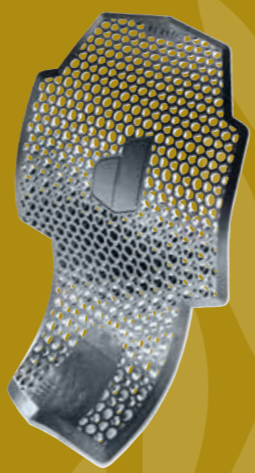

In celebration of the 20th anniversary of the Attack mountain biking pack, we've given it a new removable TPE multi-impact back protector for protection you can rely on. Developed in collaboration with the innovative safety solutions specialists at RE ZRO® we've come up with a flexible perforated structure that gives it excellent ventilation and improved comfort, and it's made from a compound that is fully recyclable and fully biodegradable.

The Airstripes back system with Air Spacer mesh has a reduced contact surface on the back, and with a wide

ventilation channel, perforated hip fins and shoulder straps generates outstanding ventilation. Ergonomically formed shoulder straps with stabilizer straps, combined with the streamlined shape of the pack, give it a compact fit for zero load wobble on the most gnarly of trails. Wrapping hip fins finish in an elastic waist belt and offer a secure fit while still allowing plenty of give. Extra-wide hip fin pockets over the top work to give extra compression and a wrapping fit, plus improved load distribution.

ATTACK 16

## SL-COLLECTION

Female specific packs

### DEUTER SL-TEAM

deuter's product development team for the women's specific SL line consists of female designers and top athletes from all disciplines /sports. It's almost an occupational habit that our experts can never stand still. Since 2006 they are always pushing forward – also when it comes to developing products.

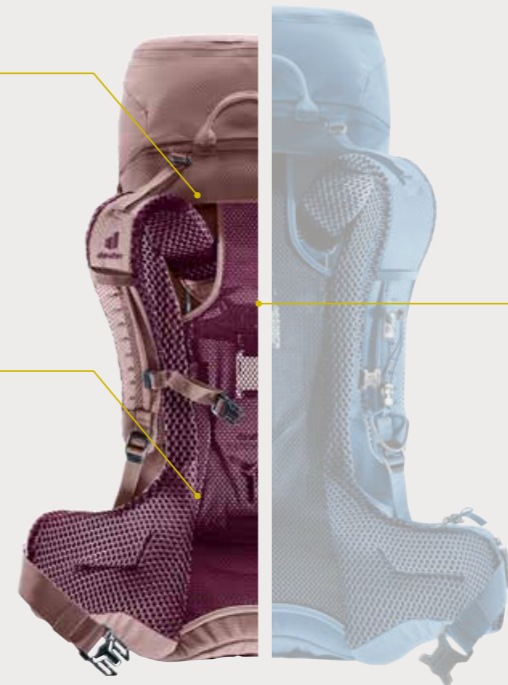

Our rucksacks are designed to fit the average athletic build. However, since not everyone fits the norm it is likely that women's models will fit many male users perfectly well, and vice versa.

#### SLIM-CUT SHOULDER STRAPS

The SL shoulder straps have a distinct S-shape and all-round soft edges. In addition the straps become slimmer towards their ends. For a perfect fit around the shoulder area - no pinching or chaffing. The shoulder straps lie closer together and are adapted to slimmer female shoulders.

#### CONICAL HIP-FINS

The closed SL hip belt forms a cone to perfectly adapt to the female anatomy. The conical shape is the result of the the ends of the hipbelt coming together in an upward direction and the anatomically adapted design for the SL hip fins. The hip fins perfectly hug the female hips.

#### SHORTER BACK

Women usually have a shorter back than men. Our SL carrying systems are adapted to the female anatomy and therefore shorter.

Standard Fit

## EL-SERIES

Extra Long Series

#### EXTENDED BACK LENGTHS BY 6-9 CM

Tall people can enjoy a perfect fit with our Extra Long EL-models! Taller sportsmen and sports-women between 1.85 – 2 m often have difficulty finding backpacks that fit their longer backs. Our favourite deuter backpack models are available to suit taller people with extended back lengths by 6-9 cm. Overall, backpacks in the Extra Long (EL) series have also grown in terms of volume. Back systems, features and details remain the same in the EL models as they are in the standard models, however.

Standard Fit

# DEUTER BACK SYSTEMS

deuter has developed different systems specifically adapted to the various sports and their specific demands.

deuter  
AIRCOMFORT

HIKING /  
TREKKING

## AIRCOMFORT BACK SYSTEM

**Maximum ventilation** thanks to the gap created between the mesh and a person's back.

**Steady load distribution** thanks to the lightweight, flexi spring steel frame.

### BENEFITS

By stabilizing and evenly distributing the load this back system relieves strain on the back over longer distances. Effective ventilation across the back reduces the burden on the circulatory system, thereby saving energy.

deuter  
AIRCONTACT

TREKKING

## AIRCONTACT BACK SYSTEM

**Energy-saving carrying comfort** thanks to the precise ergonomics of the back system.

**Good ventilation** thanks to channels between the padding and the use of breathable 3D mesh.

### BENEFITS

By distributing the load evenly, it saves energy and results in a more relaxed spine when carrying heavier loads. Effective ventilation across the back creates improved comfort and also saves energy.

deuter  
AIRSTripES

BIKE / HIKING /  
LIFESTYLE

## AIRSTripES BACK SYSTEM

**Secure fit** thanks to the streamlined ergonomics of the back padding and carry system.

**Effective airflow** thanks to reduced contact surface of the back padding with special ventilation channels between them and breathable 3D mesh.

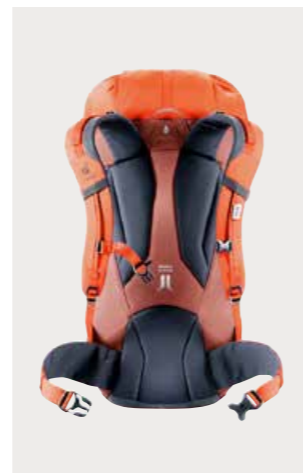

### BENEFITS

The compact fit gives it stability, preventing load wobble over rough terrain. The padding with ventilation channels also has minimized contact surface, generating airflow across 80% of the back.

deuter  
ALPINE

MOUN-  
TAINERING

## ALPINE BACK SYSTEM

**Good ventilation** thanks to channels between the back padding, covered in breathable mesh fabric.

**Compact fit** thanks to the body-hugging ergonomics of the back padding and carry system.

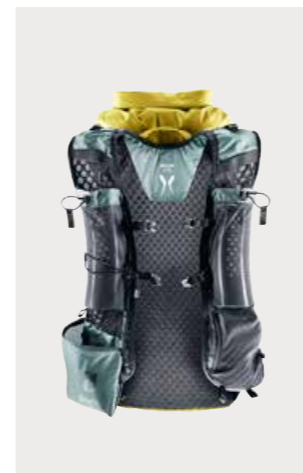

### BENEFITS

The solid, secure fit makes it easier to maintain balance, even in challenging terrain, and make controlled movements. The ergonomics and reliable ventilation also add to the carrying comfort.

deuter  
LITE

HIKING / MOUN-  
TAINERING

## LITE BACK SYSTEM

**Compact fit** thanks to the body-hugging ergonomics of the back padding and carry system.

**Reduced weight** thanks to lightweight construction and materials.

### BENEFITS

The light weight reduces strain on the shoulders and back, while the solid fit frees you up for unrestricted movement.

deuter  
LITEAIR

HIKING

## LITEAIR BACK SYSTEM

**Reduced weight** thanks to its optimized skeleton structure and lightweight back panel.

**Balanced load distribution** thanks to its flat-format reinforced structure and the body-hugging fit of the back panel.

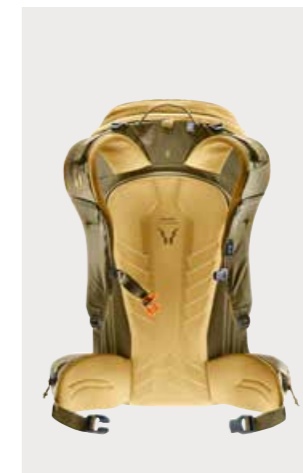

### BENEFITS

Its ultralight weight relieves strain on the shoulders and back, and the snug fit offers improved flexibility for maximum range of movement.

deuter  
LITESNOW

SNOW SPORTS

## LITESNOW BACK SYSTEM

**Dry back** thanks to the snow-shedding materials and design.

**Reduced weight** thanks to the lightweight construction and materials.

### BENEFITS

The special shape of the back padding with recesses covered in snow shedding material means snow cannot stick to it, which prevents moisture from penetrating, and results in all-day-long carrying comfort.

deuter  
CONTACT

TRAVEL /  
LIFESTYLE

## CONTACT BACK SYSTEM

**Easy on the back** thanks to the comfortable ergonomics of the back padding and carry system.

**Balanced load distribution** thanks to the snug, body-hugging fit.

### BENEFITS

The comfortable back padding, ergonomic carry system and compact fit work together to help distribute the load evenly and maximize comfort.

XS	76 cm – 82 cm
S	83 cm – 89 cm
M	90 cm – 96 cm

Man

Size	Chest Circumference
S	89 cm – 95 cm
M	96 cm – 102 cm
L	103 cm – 109 cm

**PRACTICAL OPENINGS FOR QUICK ACCESS**

This trail running vest has space for all your essentials and mandatory gear for anything from a short trail run to a full ultra. Four pockets on each shoulder strap provide on-the-go access to soft flasks, bars, cell phone etc. Stash pockets at the back offer easy access for refilling a hydration bladder and quick jacket storage. And the main compartment has space for food and extra layers. And there are multiple options for stashing collapsible poles while keeping them at the ready.

**RESOURCE-FRIENDLY MANUFACTURING**

This bluesign® product meets the highest environmental and sustainability standards. Made using a minimum of 90% bluesign®-certified materials, with components made using environmentally-friendly, resource-efficient manufacturing practices, it meets the Green Button standard, is ClimatePartner certified and made without PFAS – performance through and through.

# TRAICK BELT

### OPTIMUM VENTILATION TO SAVE ENERGY

We've selected the materials for our Aircomfort back system with ventilation in mind, making it even lighter and airier for superior carrying comfort. Extending the back mesh into the lumbar region and using softer mesh, not only results in improved ventilation but also gives it a supple, wrapping fit.

### CLEVER STOW OPTIONS FOR AT-THE-READY ORGANIZATION

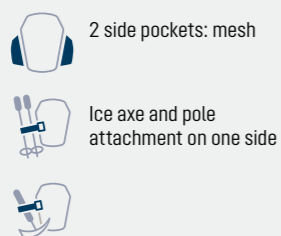

Two large stretch pockets on the outside, two hip fin pockets, two lid compartments (for the 24 SL, 26, 30 SL, 32, 34 EL), a separate bottom compartment (for the 30 SL, 32, 34 EL) and a large stretch compartment on the front give this pack plenty of organization. For quick access to the main compartment this pack has a spacious opening at the top and a U-shaped front zipper (24 SL, 26). Gear loops and attachments can be used for securing poles, a helmet etc..

# FUTURA

24 SL, 26, 30 SL, 32, 34 EL

For hiking enthusiasts who value maximum comfort and ventilation on their day-long or multi-day hiking adventures.

### INNOVATIVE BACK SYSTEM FEATURES FOR A COMFORTABLE CARRY

Our new VariClick system offers five-stage back length adjustment for a tailored fit. This easy-to-use feature benefits from an audible 'click' when in position. And because it stems from the center of the pack, it creates an evenly adjusted length. Anchored directly to the frame, the shoulder straps deliver impressive load transfer. And two positions for the stabilizer straps means the system adapts to different sizes. The hip fins distribute the load evenly onto the hips. And the continuous one-piece padding for the hip fins and shoulder straps eliminates pressure spots and increases the carrying comfort.

**CLEVER STOW OPTIONS  
FOR AT-THE-READY ORGANIZATION**

Quick-release pole attachments on the shoulder straps keep them close at hand for when they're needed. A large stretch pocket at the side has dual access to keep items like a water bottle within reach without having to remove the pack. Two hip fin pockets, two lid compartments, a separate bottom compartment and a large stretch pocket on the front keep you organized on the move. And this pack has quick access to the main compartment via the spacious opening at the top.

### INNOVATIVE BACK SYSTEM FEATURES FOR COMFORTABLE LOAD CONTROL

Our new VariClick system offers five-stage back length adjustment for a tailored fit. This easy-to-use feature benefits from an audible 'click' when in position and because it stems from the center of the pack creates an evenly adjusted length. The new ActiveBalance shoulder straps have a pivoting shoulder panel that moves independently from the pivoting VariFlex hip fins for greater load stability and a more central positioning of the pack.

The ECL (ergonomic comfort lock) system transfers the load effectively onto the hips. The Y-shaped aluminum frame gives the pack stability and, combined with the breathable Air Spacer mesh on the Aircontact back system, generates maximum airflow across the back. Continuous one-piece padding for the hip fins and shoulder straps cuts out pressure spots and increases the carrying comfort.

**ON-THE-MOVE HIP FIN POCKETS AND SIDE POCKETS**

Large side pockets which can be accessed from both sides, and generous hip fin pockets provide extra storage and better organization for items that need to be within reach. A zip-out 1.5-liter bottle holster in one of the hip fin pockets also lets you hydrate on the move.

**EASY-ACCESS LARGE ZIPPER OPENING**

A wide, U-shaped zipper on the front makes the backpack contents easy to locate and access.

**OUTSTANDING COMFORT-TO-WEIGHT RATIO FOR ADAPTABILITY**

The slimline waist belt (Guide Lite 22 SL & 24), stowable hip fins (Guide Lite 28 SL & 30), removable mesh helmet holder, practical gear loops, climbing rope strap and ice axe attachments on both sides not only provide excellent comfort at minimal weight but also make it possible to use the pack in a variety of ways, including wearing it with a climbing harness.

**DURABLE MATERIALS FOR RELIABILITY**

The body fabric is 100% recycled ripstop, making it highly robust, durable and resistant to abrasion. It also protects contents effectively from moisture, dust and contact with rock. Buckles in lightweight, weather-proof material give the pack even safer handling and a longer lifespan.

# GUIDE

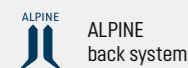

32+6 SL, 34+6, 42+6 SL, 44+6

For experienced alpinists who value a comfortable, secure fit and need a durable companion for extended alpine adventures.

### OPTIMAL BACK SYSTEM FOR CONTROLLED MOVEMENT

The deuter ALPINE back system delivers a solid, secure fit so the pack doesn't impede agility in challenging alpine terrain, while also offering superior comfort. An ergonomically shaped PE backplate with a sewn-in spring steel frame maintains the pack's shape and offers stability, no matter how big the load. And it ensures carrying comfort and stability at minimal weight. Side compression straps also allow the volume of the pack to be cinched in close to your center of gravity.

**BAGFIX QUICK-RELEASE SYSTEM FOR EASY HANDLING**

The improved BagFix quick-release system is easy to use. The top mounting rail with two hooks allows for precise lateral positioning on your bike rack. The included spacers (8-10/10-12/14-16 mm) guarantee a snug fit on a range of bike rack diameters. While the curved hook on the bottom rail anchors the bag securely on the bike rack bars, for zero swaying around corners.

**PRACTICAL MULTI-PURPOSE USE**

Whether it's for cycle touring or as an everyday workhorse, and with a detachable shoulder strap and reinforced edges, the options are virtually endless for this bicycle pannier.

# ATTACK

14 SL, 16, 18 SL, 20, 22 EL

For ambitious mountain bikers looking for a compact-fitting bike backpack with built-in back protector that offers maximum comfort and protection for the gnarliest downhills.

### BIKE-SPECIFIC BACK SYSTEM FOR COMFORT AND STABILITY

The air permeable AIRSTRIPES back system with breathable Air Spacer mesh, and the streamlined shape of the pack create a compact fit. Wrapping hip fins finish in an elastic waist belt that offers a solid fit while still allowing plenty of give for taking deep breaths. And the strap extension on the extra-wide hip fin pockets offers secondary compression for a compact shape. Ergonomic shoulder straps and stabilizer straps work together to optimize balance and create a secure, precise fit for the most challenging of trails.

Kid Carrier

Kid Carrier

For parents looking for a safe child carrier with top comfort for their kids and themselves to explore nature together.

- continuously adjustable chest strap
- load adjustment straps
- unisex fit
- hip belt is easy to adjust even with heavy loads via the Pull-Forward system construction

- Optimum load transfer thanks to ergonomically shaped hip fins
- the sturdy aluminium frame with broad platform is tip-over resistant – very helpful when getting into the seat

exact and stepless VariSlide back-length with wide-ranging adjustment so both parents can comfortably carry the child

- height-adjustable child's seat with varying cushion width according to age for a healthy seating position
- height-adjustable foot rests with adjustment to fit the child's feet

- frame is covered with fabric in seating area
- easily attached sun roof included
- pleasant ventilation through perforated shoulder straps

- different cover material in child's seating area: airy and soft in the comfort zone and robust and washable in the foot areas

- two zipped pockets on hip fins
- key holder
- two grab handles
- 3M reflector
- folds for transport

- different cover material in child's seating area: airy and soft in the comfort zone and robust and washable in the foot areas

- two zipped pockets on hip fins
- key holder
- two grab handles
- 3M reflector
- folds for transport

**Further details Kid Comfort Pro:**

- permanently integrated, fast to assemble sun roof
- integrated, separately useable daypack in bottom compartment with inside pocket and the possibility to attach daypack on sternum strap
- mirror for view of the child on the back in hip pocket

materials: 210D PA

**Kid Comfort Active:** For parents looking for a safe and light child carrier.

**Kid Comfort Active SL:** For mothers that hold their own and want a child carrier that fits them extremely well. Slimmer SL-shoulder straps and conically shaped SL-hip fins are especially adapted to fit the female anatomy.

LITE back system

light weight

fast VariQuick back-length adjustment with large scope so both parents can comfortably carry the child

 ALPINE

For mountain sports photographers and filmmakers who need a hard-wearing, comfortable camera backpack that's specifically designed to house their high-tech gear and protect it from the elements, while also offering secure handling for alpine use.

Whether it's a moment in sporting history, beautiful landscapes, or wildlife up close and personal, with this professional camera backpack you'll never miss a shot.

- ALPINE back system
- Front pocket for avalanche equipment
- Clamshell zippered back panel
- Ice axe and pole attachment on one side

- 2-way adjustable sternum strap
- Ergonomic & padded shoulder straps
- Sternum strap buckle with one-handed operation
- Stabilizer straps
- Detachable hip fins

- Safety whistle
- Hip fin pocket with zipper closure
- Side access
- Pop-up weather screen
- Top-loader with roll-top closure and lid compartment (with zip-out divider)
- Roll-top expandable volume
- Ski attachment at the side
- Snowboard attachment on the front
- rope fixation
- Attachment loops
- Glasses stow system
- Grab handles
- External compression straps at the sides
- Body fabric hard wearing
- Body fabric water repellent
- Water-repellent base
- Reinforced base
- Lid compartment
- Removable organizer unit for a tablet, laptop (up to 16") and documents
- Modular internal configuration
- Inner compartment
- Valuables compartment inside
- Document compartment inside

- ALPINE back system
- water-resistant, TPU-reinforced stable base
- lockable zippered front compartment with double-padded laptop sleeve, three small, zippered pockets and a stash pocket for lens filters, flashes, light reflectors, plus loops for pens or brushes
- quick and easy access to main compartment via sturdy zip around rear opening
- flexi spring steel frame for effective load transfer
- stabilizer straps
- precision-adjustable sternum strap
- detachable, ergonomic, padded hip fins with two zippered pockets
- two large stretch side pockets for water bottles or small tripod
- glasses stow system on shoulder strap
- zippered valuables pocket inside lid
- top-loading lockable lid compartment with 4 liters capacity extension for change of clothes, jacket, snacks, first aid kit etc.
- zip-through lid compartment base for direct access to main compartment
- three zippered pockets on reverse side of back panel for smaller items like filters etc.
- large main compartment with hook and loop tape dividers that can be moved to accommodate a range of sizes and types of camera gear: 5 x 1-bay dividers, 3 x small 1-bay dividers, 2 x 2-bay dividers, 2 x 3-bay dividers, 2 x 4-bay dividers
- designed to fit telephoto up to 500 mm with lens hood, 600-800 mm telephoto with simple lens hood, and when using extended capacity, a camera with mounted telephoto
- four modular gear straps and one side strap with aluminum hook buckle to attach further gear like a sit mat, jacket, or big tripod
- precise tripod positioning means backpack remains upright when placed on the ground

**EFFECTIVE INSULATION FOR INCREASED PERFORMANCE**  
The ThermoHood contoured hood combined with the PeakDesign construction in the upper section and PowerBox system in the foot zone mean that the 750 cuin RDS-certified down is evenly distributed for consistent insulation performance. And no cold bridges thanks to the 360° insulation and trapezoidal shaped baffles. The ThermoStretch seams inside also make it quick to warm by contouring the body which reduces the space to be warmed by 25%.

OPTIMAL FIT FOR REGENERATIVE SLEEP

A good night's sleep is essential for restoring energy levels. The mummy fit with stretchy ThermoStretch seams inside not only helps retain warmth but also gives the fill stability and a cozy feel. The ThermoHood wraps around the head, while the Ergofoot Pro 3D footbox allows for plenty of wiggle room. And the 360° insulation system results in evenly distributed warmth no matter how much you move in your sleep.

# DREAMLITE

10C/50F, 15C/59F

For nature lovers who value a good night's sleep whether it's van camping or staying in a hut.

**EFFICIENT SHAPE AND FUNCTIONALITY FOR CLIMATE CONTROL**

The oval shape and 360° insulation system plus contoured hood with drawcord come together to offer effective insulation performance by trapping heat inside the bag. While the generous cut offers superior comfort. Which makes this the ideal sleeping bag for temperate climates where good insulation is needed.

**MULTIPURPOSE FOR A WIDE RANGE OF USES**

This is an incredibly versatile sleeping bag. Use it on a camping trip, for camper van adventures or spending the night in a hut – the easy-care synthetic fill combined with ample freedom of movement make it the ideal choice for a wide range of situations.

**MORE FREEDOM OF MOVEMENT FOR A RESTFUL SLEEP**

The oval shape and increased foot space gives this sleeping bag extra freedom of movement in the shoulder, knee and foot zones. Which makes it suited to people who move around a lot in their sleep or like to lie on their side. It offers plenty of space for movement. And combined with the pleasant hand feel of the lining gives it superior comfort for a restorative night's rest.

# STARLIGHT DOWN

A lightweight, 4-season down sleeping bag that gives budding young adventurers a cozy night's sleep and many years of outdoor enjoyment.

**CLEVER CONSTRUCTION FOR A RESTFUL NIGHT'S SLEEP**

The soft lining in this ergonomically designed children's sleeping bag wraps around them to keep them cozy. While our 360° distribution of duck down fill generates naturally impressive insulation from head to toe.

**LIGHTWEIGHT INSULATION PROPERTIES OF DOWN**

Whether it's a camping trip or a hut-to-hut adventure, the lightweight down combined with the hard-wearing shell fabric of this sleeping bag make it a versatile companion for a range of uses, regardless of the season.

360° FILL SYSTEM FOR 360° ISOLATION

The top and bottom layers of a deuter sleeping bag are identical and contain the same amount. That's because we are aware that despite EN-norm tests assuming that a person will lie on their back, in reality, people move about in their sleep. By using our 360° fill system, we can guarantee our comfort ratings in all sleeping positions – and no more cold back!

# INFINITI SERIES– MADE FROM REMNANTS

And with it, we've managed to cut down our carbon footprint even further. By taking remnants from our production we've developed versatile, sustainable products in what we call the Infiniti series. These bags and packs are made from lovely fabric remnants from the manufacture of existing deuter products.

For the Infiniti series, we use remnants fabric from our production line that is 100% functional.

This surplus fabric, which would otherwise go to waste, is turned into a series of bags and packs, thereby reducing the ecological footprint of our production.

There are variations between the individual products in terms of the way these fabrics are applied, the surface area that is used and their aesthetics. But all fabrics are tested for functionality to ensure the end product is of a consistently high standard.

deuter is proud to support the 1% for the Planet nonprofit organization with sales of its Infiniti series. 1% for the Planet supports businesses and individuals in giving back to the planet in the most impactful way possible by building strategic partnerships that connect funds with causes. By donating 10% of the buying price of the Infiniti series to 1% for the Planet, deuter is delighted to be supporting environmental projects throughout the world.

For more information about 1% for the Planet visit: [www.onepercentfortheplanet.org](http://www.onepercentfortheplanet.org)

## INFINITI SHOPPER

**INFINITI GYMBAG**

# 6810022 | 150 g | H 38 x W 34 D 19 cm

AVAILABLE IN GERMANY

City | Travel

- hanging loop
- packs down small – good for traveling
- zipper side pocket for cellphone
- drawcord closure with cords used as shoulder straps

**INFINITI WHEEL BAG**

# 6900022 | 720 g | H 78 x W 78 x D 10 cm

AVAILABLE IN GERMANY

Travel

- suitable for MTB wheels
- two carry handles
- hard-wearing, water-resistant canvas
- reinforced over axel
- large opening with 2-way zipper
- suitable for all conventional adult wheel sizes

**INFINITI ROLLTOP**

# 6810122 | 345 g | H 46 x W 27 x D 8 cm

AVAILABLE IN GERMANY

City | Travel

- document pouch inside
- roll-top closure for extendable volume
- adjustable carry straps also secure roll-top

**INFINITI SKI BOOT BAG**

# 6900524 | 480 g | H 40 x W 50 x D 25 cm

AVAILABLE IN GERMANY

Ski

- boot bag for ski boots with soles up to 46 cm long
- large zip around opening
- mesh ventilation panel
- carrying handle
- designed for transportation of boots only
- body fabric made from offcuts

**INFINITI BACKPACK**

# 6810222 | 390 g | H 45 x W 28 x D 22 cm

AVAILABLE IN GERMANY

City

- deuter Contact back system
- ergonomic shoulder straps
- two side pockets
- large 2-way zipper opening
- large zipper front pocket with key clip
- stretch compartment inside
- unisex

**INFINITI SKI BAG**

# 6900624 | 740 g | H 20 x W 190 x D 22 cm

AVAILABLE IN GERMANY

Ski

- ski bag for skis up to 190 cm long
- large zip around opening
- twin carrying handles
- body fabric made from offcuts

**INFINITI DIRTBAG**

# 6900322 | 45 g | H 33 x W 16 x D 16 cm

**INFINITI DIRTBAG KIDS**

# 6900222 | 35 g | H 25 x W 16 x D 16 cm

AVAILABLE IN GERMANY

Trekking  
Climbing  
Hiking

- lightweight
- drawcord closure for ease of use
- dirt- and water-resistant fabric
- packing bag doubles as dirt bag

**INFINITI GEAR BAG**

# 6900424 | 45 g | H 14 x W 16 x D 13 cm

AVAILABLE IN GERMANY

Ski

- bag for transporting ski crampons or other items that require quick access
- hook & loop straps to attach to shoulder straps
- drawcord closure
- body fabric made from offcuts

Our manufacturing process well as the quality of the textiles we use ensures the long-time durability and longevity of our products. The materials we use are adapted to their future use as backpack textiles and produced especially for deuter. Performance, deuter's standards, and their safety for consumers are regularly tested in labs and are therefore assured.

The majority of the raw material we use in our textiles is polyester (PES) and polyamide (PA). They handle well due to their properties and they are robust and tearproof. The outer fabrics we use, especially our rain covers, are water resistant. This provides ideal traits of products that are intensively used outside like our backpacks and sleeping bags.

All our textiles are coated on the inside, making the respective material more durable, more water repellent, and the seams more stable. The consistency and strength of this polyurethane coating (PU) varies depending on its future use. The outside of our textiles is treated with a DWR (Durable Water Repellent) coat to obtain a high level of water and dirt repellent properties. We only use PFAS free finishings.

We use textiles in differing strengths to make sure our products fulfil their respective function. We state these in denier (D). This measurement unit is established in the outdoor market and has lead to comparability within our own collection. It goes back to the old French unit of weight also called denier. This means that 1D = 1 gramme per 9000 meters of yarn. The lower the number in front of the "D" the thinner the respective textile. Our unit therefore describes fabrics that range from very sturdy and durable to extremely light textiles.

However, the durability and strength of a textile cannot only be taken from its denier number. The weave, structure, and application-oriented mix of raw materials also plays a role. The finishing of the yarn before the weaving process also has a decisive impact. We also state relevant equipment and features. Weaving in stronger threads or reinforced structures can make thinner material more durable and more stable. We call this feature "Ripstop" for example. If other processed or surface-finished yarns are used then the product is labelled with "high tenacity".

**YKK® zippers:** The most high-quality zippers available on the market are absolutely robust and reliable.

**Multi-chamber aluminium profile rails:** The weight-bearing elements of our backpacks are made from high-quality aluminium. This makes them durable and light at the same time. Its special constructions makes it possible to combine these two traits. A flat aluminium rail is separated into several different chambers by internal partitions. The cross sections shows a hive-like structure that provides stability. The multi-chamber aluminium profile rails are used in differing widths depending on the model of the backpack.

**Permanently elastic spring steel frames:** Spring steel is incredibly durable and elastic. It springs back into form again and again nearly unbreakable after being deformed. A round profile allows a very flexible construction of the frame. A flat profile provides a frame with extremely high form stability. Both give our Aircomfort models with its patented ventilation a permanently stable tension of the back net.

Our upper materials and filling for sleeping bags are made of polyamide and also polyester for the most part. We predominantly process textiles with low deniers. These are also often structured. The fabrics are light and at the same time very durable and always moisture repellent. PFAS free materials are increasingly being used. In addition we also make sure to use breathable materials to ensure pleasant sleeping conditions.

Fabric in the so-called Dryzones is especially processed and enables a high water column. The sleeping bag stays comfortably dry.

Our fillings are also light and comfortable. Good insulation properties and breathability are necessary requirements for the materials that we use in our products.

Some of our sleeping bags used brushed materials like the Brushed Thermo Fleece. The light and very high-quality polyester fleece feels soft and cozy to the skin due to its fluffy brushed surface. The material offers an excellent warmth-weight ration. Furthermore it is highly breathable, long-lasting,

and easy to clean. Its short drying time is another benefit. Its high level of elasticity supports freedom of movement of the Thermo-Stretch-Comfort-construction in our Exosphere SL models. It also keeps warm in the Orbit SL models.

FILLING SLEEPING BAG

SYNTHETIC

**High-Loft Hollowfiber:** Synthetic hollow fibres are processed to a filling fleece (by thermal bonding). To ensure good compression and high loft, silicone is added. Remarkable insulation rating, tear resistant and durable.

**Thermo ProLoft®:** A special thermal process turns Polyester fibres into top quality technical Thermo ProLoft® insulating fleece. The combination of dense and hollow fibres results in the perfect blend between durability, weight and warmth properties – a fleece material that is easy care and durable yet compact and offers excellent insulation at minimal weight. The synthetic fibres also absorb very little moisture. Short drying times, excellent loft and thus insulation properties even when damp, are all advantageous characteristics. deuter Thermo ProLoft® is also coated with a thin layer of silicone to give it good lofting properties.

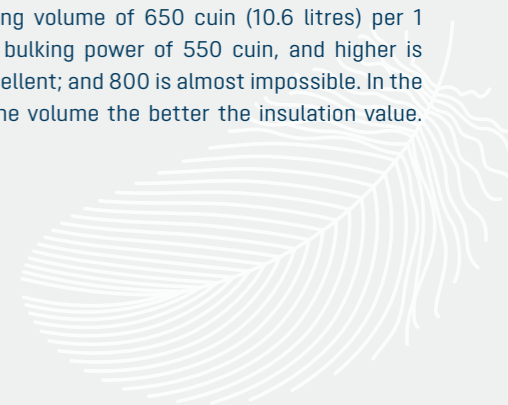

**Combining:** deuter sleeping bags Orbit, Exosphere and Space can be zipped together. Use left-hand zip and right-hand zip versions when combining.

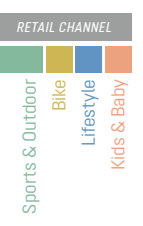

DOWN

Since June 2005 we only use down feathers certified in accordance with the Responsible Down Standard (RDS) – benefits: no live plucking, no force feeding, supply chain traceability, animal welfare guaranteed at every stage and verification by independent certification institutes around the world.

**Composition:** The deciding factor in a down sleeping bag is the down quality. Primarily this is a matter of the weight ratio of down to small feather mixture, which is expressed in percent. deuter uses only the high performance filling ratio of 90% down to 10% small feather (90/10).

**Fill power / cuin:** High quality sleeping bags should have a fill power of at least 650 cuin (cubic inches). This measurement in cubic inches per ounce of down shows the quality of the bulking and expansion power of the filling. High quality down has a bulking volume of 650 cuin (10.6 litres) per 1 ounce (28.3g). A bulking power of 550 cuin, and higher is good; of 650 - excellent; and 800 is almost impossible. In the end: the higher the volume the better the insulation value.
